

GONG SHOW TALKS

- Luca Melotti, IFT UAM/CSIC
The moduli space curvature and the Weak Gravity Conjecture
- Enrico Turetta, University of Padua
Localization of the 5D supergravity action
- Elba Alonso-Monsalve, Massachusetts Institute of Technology
Phase space of JT gravity with positive cosmological constant
- Carmen Gómez-Fayrén de las Heras, IFT UAM/CSIC
Gravitational higher-form symmetries and the origin of hidden symmetries in Kaluza-Klein compactifications
- Ignacio Ruiz, IFT UAM/CSIC
Topology Change and Cobordisms to Nothing through Morse-Bott theory (based on 2410.21372 [hep-th])
- Pau Solé, University of Barcelona - ICCUB
Gravitational collapse on the boundary
- Max Velasquez Cotini Hutt, Imperial College London
Generalised symmetries, anomalies and Goldstone modes
- Pedro Tarancón Álvarez, University of Barcelona
Gravitational Duals from Equations of State
