

**Master in Quantum Science and Technology
2018/19**

Calendar

- 1st Term:** The first term starts on **October 1, 2018**. Lecturing will take place through to **December 20, 2018**. There will be one week available for exams from January 7, 2018 to January 11, 2018. The official calendar of the Faculty of Science and Technology will be applicable; thus there will be no lectures nor availability of personnel on the following days: November 1 and 19, and December 6.
- 2nd Term:** The second term starts on **January 14, 2019**. Lecturing will take place through to **March 22, 2019**. There will be one week available for exams or final presentations from March 25, 2019 to March 29, 2019. No exams nor presentations used for assessment of the second term can be placed after this date.
- Resits:** In the (hopefully unlikely) event of a student failing a subject in the first call, the resit exam or additional presentation will take place from April 8, 2018 to April 12, 2018.
- Theses:** The defence of the Masters Theses will be of preference in September. If there are special circumstances (to be argued in front of the Steering Committee), the defence can be brought forward to July.
